SPIDER 18.90

SELF-PROPELLED AERIAL WORK PLATFORMS

SERIE SPIDER 18.90

BEST PERFORMANCES

1. Greater Versatility with Flying Jib

- The FLY JIB has 2 big advantages, it gives a longer outreach and allows the basket to be smoothly operated.
 The fly jib with 160° movements of-
- The fly jib with 160° movements offers a greater versatility and flexibility, improving working area and making easier to reach points otherwise impossible to be reached.

2. Attentions To Details

- Compact design & highest quality components reliable and robust.
- Global protection of the electric and hydraulic components by means of metal shields, including legs piston rods.
- Air, Water & 230/110 Vac outlets into the basket as main standards.
- Cranked outrigger design for increased ground clearance.

3. Enjoy the experience of easy controls

- Proportional, smooth and precise hydraulic controls.
- On demand the wireless remote that includes a spare battery and charger.
- The system is supplied with a spare cable to let the operator drive the machine in case of dead radio battery or in areas on which the radio frequencies are not allowed

4. Automatic & Proportional side outreach control

- The safety system automatically reduce the outreach by monitoring always the weight into the basket.
- It allows to operate the machine up to the maximum height with 200 kg lifting capacity and no restrictions.

5. Two Speed tracking

- It can be equipped with double proportional driving speed up to 2,5 Km/h in order to guarantee an easy and fast drive with combustion engine.
- The fast speed selection enable a good drive speed even when powered by batteries or 110Vac.

6. Quick detach and interchangeable cage

- Alluminium basket easy to remove.
- It's really interesting to see that even if there is the cage rotation on, the basket can be easily detached thank to the aid of two wheels.
- All detachable baskets are connected to the support with no devices protruding underneath the cage.

7. Variable track width with no hydraulic devices.

- An exclusive undercarriage developed by Platform Basket makes possible to extend or retract the tracks enabling better platform stability when driven.
- The narrow tracks position makes the machine 0,78m wide and less than 2,00m height.
- The wide tracks position makes the model easy to be driven off-road or on slopes.

8. Electronic Planarity Indicator

- A high precision level gauge fitted to the spider chassis enable to operate the platform movements only when it has leveled within 1,5 deg.
- Particularly useful for rental industry when operators are not keen enough to stabilize the machine.

STANDARD EQUIPMENTS	VERSION		
STANDARD EQUIPMENTS	STD	Е	
Double articulated boom with telescopic upper boom and flying jib	•		
Honda iGX390 combustion engine (diesel on demand)	•		
Smooth and proportional drive speed	•		
Live hydraulic controls into the basket	•		
Stabilization monitored by an electronic planarity sensor (max 1,5deg)	•		
All components are well protected against objects fall.	•		
Light allu basket and easily detacheable.	•		
Air-water and 230/110Vac outlets in the basket	•		
Hydraulic basket rotation 80+80 deg	on demand	•	
Extendeable undercarriage with diagonal set-up.	•		
Deep-cycle batteries 24Vdc, electric power-pack for indoor use		•	
Battery charger 24Vdc with power selector.		•	
Single Phase electric pump 230/110Vac for indoor use.	•		
Built-in fault messages diagnostic	•		
EXTRAS - ON DEMAND	STD	E	
Non marking rubber tracks particularly suitable for delicate floors.	•	STD	
Double drive speed system with slow/fast selector control	•	STD	
Two cylinders liquid cooled diesel Kubota Z482 engine with automatic speed governor.	•		
Radio remote control unit for drive and stabilization including automatic set-up. (supplied with spare battery, on-board battery charger and emergency cable)	•		
Electric power pack for emergency descent (12Vdc).	•		
Quick and easy detachable single man basket.	•		
Oversized foot plates for soft ground.(diam.330mm)	•		
Oversized square 40x40cm nylon plates supplied with on-board housing frame.	•		
Arctic lubricants for cold climate	•		
Biodegradable hydraulic oil	•		
Basket working light	•		
Lithium-ion battery pack for longer working cycle		•
